## PROFESSIONAL SUMMARY

Final-year BS Artificial Intelligence student with **real-world industry experience** delivering AI-powered applications for international clients. Built and deployed production-grade systems including facial recognition, anti-phishing ML tools, RAG chatbots, and full-stack AI platforms using Python, OpenAI APIs, TensorFlow, PyTorch, and Scikit-learn. Proven ability to develop, test, and optimize AI models end-to-end — from data pipelines to deployed REST APIs and React frontends. Passionate about Generative AI, LLMs, prompt engineering, and emerging AI technologies.

## EDUCATION

**Air University, Islamabad** 2022 – 2026  
*BS Artificial Intelligence* CGPA: 3.1

- Relevant Coursework:** Machine Learning, Deep Learning, Computer Vision, NLP, AI Systems, Data Structures & Algorithms, Cloud Computing, Database Systems, Data Analytics

## EXPERIENCE

**AI & Automation Intern** 2024 (4 Months)  
*NexGen Guards* Islamabad

- Delivered **2 production AI systems** for **Siberkoza**, collaborating in cross-functional teams to meet enterprise-grade requirements.
- Engineered and tested **5–8 Python-based AI automation workflows**, reducing manual operational effort by approximately **40%** and improving overall system efficiency across live enterprise operations.
- Built real-time AI task execution scripts and automated workflow monitoring tools, enabling intelligent decision pipelines with reduced human intervention.
- Optimized data pipelines for reliability and throughput, cutting processing latency and enabling faster ML model inference in real-time production environments.
- Performed end-to-end model testing, debugging, and deployment of AI-powered applications, ensuring performance consistency across production systems.

**Facial Recognition Authentication System** 2024  
*Siberkoza* Islamabad (On-site)

- Developed and tested a real-time **ArcFace-based deep learning** facial recognition system for enterprise identity verification, delivering a production-ready, enterprise-grade solution.
- Engineered secure backend APIs and access control workflows, integrating the recognition system into live infrastructure with robust authentication logic.
- Optimized model inference speed and accuracy through iterative testing and tuning, ensuring the system met enterprise-grade reliability standards for deployment.

**Anti-Phishing URL Detection System** 2024  
*Siberkoza* Islamabad (On-site)

- Built and optimized ML classification models (Scikit-learn, XGBoost) for malicious URL detection, achieving approximately **93–95% accuracy** through systematic feature engineering on domain and lexical attributes.
- Designed and deployed the model as a **REST API** with Flask and developed an interactive frontend testing interface, delivering a complete end-to-end AI-powered cybersecurity application.
- Performed rigorous model evaluation, data analysis, and optimization cycles to maximize detection precision and minimize false positives for real-world phishing threat scenarios.

## AI PROJECTS

---

### AI-Powered Virtual Fashion Platform | *FYP – Deployed | React · OpenCV · Flask · REST APIs*

- Developed and **deployed** a full-stack AI application featuring a computer vision-based virtual try-on system with body-shape detection and garment alignment — built on curated fashion datasets and served live via a **React frontend**.
- Designed and launched an interactive **React UI** for real-time outfit mix-and-match previews, integrating frontend seamlessly with Flask backend APIs for low-latency model responses.
- Built an AI-driven styling recommendation engine trained on body type, skin tone, and preference datasets, delivering personalized outfit suggestions to live users.
- Engineered scalable **REST API** backend pipelines connecting CV models to the deployed frontend, and applied emerging Generative AI techniques (reverse image search, garment alignment) to deliver a production-grade AI product.

### Mental Health Support Chatbot | *Generative AI · RAG · OpenAI API · FAISS · Prompt Engineering*

- Developed a **Generative AI** conversational chatbot using **OpenAI API** and a **RAG pipeline with FAISS vector search**, achieving context-aware, semantically accurate responses across multi-turn conversations.
- Applied advanced **prompt engineering** techniques to optimize LLM output quality, reducing hallucinations and improving response relevance for sensitive mental health conversations.
- Designed adaptive AI agent-style backend conversation logic for personalized, context-retaining dialogue flows, demonstrating applied Generative AI development from research to deployment.

### Weather Prediction System | *IoT · Arduino · ML · Streamlit · Real-time Analytics*

- Collected and preprocessed real-time environmental sensor datasets via Arduino, engineered features, and trained ML prediction models — demonstrating full pipeline ownership from raw data collection to model deployment.
- Built and deployed an interactive **Streamlit frontend** dashboard for live analytics and predictions, making model outputs accessible through a user-facing interface.

## ENTREPRENEURSHIP & INNOVATION

---

### Co-Founder — Carvo | *AI Automotive Platform – Ongoing*

- Leading technical development of an AI-powered application for predictive vehicle maintenance and diagnostics, designing backend AI agent workflows and recommendation systems connecting users with verified mechanics.
- Researching and applying emerging AI technologies for automotive diagnostics, driving continuous product iteration and real-world validation to build a scalable, innovation-first AI product.

## LEADERSHIP & COLLABORATION

---

### Event Manager & Host

2022 – 2024

*Air University*

*Islamabad*

- Organized and led national hackathons, AI competitions, and technical seminars, coordinating multidisciplinary teams of developers and stakeholders to deliver high-impact events — demonstrating strong communication and collaboration skills essential in cross-functional AI project environments.

## ACHIEVEMENTS

---

**BizzTech 2025** — 3rd Position Nationwide

**Hult Prize 2025** — Top 50 Nationwide

**Certifications:** Power BI for Data Analytics (DataCamp) | Machine Learning (DataCamp)

## TECHNICAL SKILLS

---

**Programming:** Python, JavaScript, C++, SQL

**Generative AI & LLMs:** OpenAI APIs, RAG, Prompt Engineering, AI Agents, Automation Workflows, Vector Databases (FAISS)

**AI & ML:** Machine Learning, Deep Learning, NLP, Computer Vision, Model Optimization, Predictive Modeling, Model Testing & Deployment

**Frameworks:** TensorFlow, PyTorch, Scikit-learn, XGBoost, OpenCV, Pandas, NumPy, Hugging Face

**Backend & APIs:** Flask, REST APIs, Database Management, Docker, Postman

**Frontend:** React, HTML, CSS, JavaScript — full-stack AI application interfaces & interactive UI development

**Data Analytics:** Feature Engineering, Data Cleaning, Visualization, Dashboards, Power BI

**Tools:** Git, GitHub, AWS, GCP, Google Colab, VS Code, Streamlit

**Core Competencies:** Problem Solving, AI-first Thinking, Research & Emerging Tech Adoption, Collaboration, Cross-cultural Teamwork

## LANGUAGES

---

**English:** Professional    **Urdu:** Native    **Turkish:** basic
